Safe in the Knowledge

Who is it for?

This course is suited to construction project managers dealing with refurbishment where asbestos may be present. After completing the UKATA Asbestos Awareness syllabus we will begin with developing a good understanding of the key pieces of legislation. The remainder of the course will follow the process from evaluating pre construction information and survey reports through the removal and remediation process to updating of asbestos management plans. This will assist delegates in having the knowledge to ensure project are completed in a safe and compliant manner alongside ensuring best value is achieved from service providers.

What is covered?

- What is asbestos?
- How was it used?
- Who is at risk from asbestos?
- How does asbestos harm health?
